

Assessment and Evaluation

During a semester, the student may be required to take the following tests and examinations for each course. Each instrument carries proportionate marks, which are accumulated in the total marks.

UMT uses a **Relative Grading Scheme**, allowing students to achieve a grade with respect to their ranking in the class. Students are formally evaluated by the Resource Person through different pedagogical assessment tools throughout the semester.

Methods Used in Relative Grading

Any of the following methods may be used to grade students under the Relative Grading Scheme:

- Normal / Bell-Shaped Curve
- Distribution Gap Method
- Standard Deviation

A wide range of assessment methods are available to Resource Persons to evaluate the level of knowledge and skills acquired by students in a particular subject. The following two methods are generally employed at UMT:

- Sessional Evaluation
- Final Term Examination

Sessional Evaluation

A combination of the following assessment methods may be employed as part of sessional evaluation:

- Case Study
- Presentation
- Assignments
- Quizzes
- Class Participation
- Attendance
- Projects
- Viva Voce (for lab courses)
- Mid-Term Examinations
- Final Term Examinations

Evaluation

The final standing of each participant in each course is assessed through the **Mid-Term Examination, Sessional Work** (presentations, assignments, quizzes, class attendance, participation, practical work) and the **Final Examination** at the end of each semester.

For Undergraduate Degree Programs

Sr. No.	Category	Theoretical Subjects (%)	Practical Subjects (%)
1	Assignments / Projects	20–35	40
2	Quizzes	15	—
3	Mid-Term Examinations	25–30	—
4	End-Term Examinations	40–50	60
Total		100	100

For Graduate Degree Programs

Sr. No.	Category	Theoretical Subjects (%)
1	Assignments / Projects	25
2	Quizzes	—
3	Mid-Term Examinations	25
4	End-Term Examinations	50
Total		100

Note: Mid-Term and End-Term Examinations are mandatory for both Undergraduate and Graduate Programs.

Marks Allocation

A total of **100 marks** are allocated to a course or subject. These marks are normally assigned according to the prescribed assessment structure.

Final Term Examination

A total of 100 marks are allocated to a course or subject. The assessment normally consists of:

Sessional Work

Sessional work may include:

- Case Study
- Presentation
- Assignments

- Quizzes
- Class Participation
- Attendance

End-Term Examination

The End-Term Examination is conducted at the end of the semester, excluding courses such as projects, internships, and theses where applicable.

However, the marks allocation or weightage may vary in some cases depending on the nature of the course or as deemed appropriate by the Resource Person.

The Resource Person is required to announce the student's sessional evaluation in the class and display it on the notice board before the closing of classes.

After classes are over, Final Term Examinations are conducted by the **Office of Controller Examinations (OCE)** according to the official date sheet.

Compiling Results

After the marking of the End-Term Papers, the respective Resource Persons initially compile the results by adding the marks secured by participants in **Sessional Work and End-Term Examination** to complete the course evaluation.

The percentage of marks secured by a participant is then converted into the corresponding letter grade.

The complete Award List / Result is duly signed by:

1. **Resource Person**
2. **Chairperson / Dean**

The signed result is submitted to the **Office of Controller Examinations (OCE)** within three days of the examination being conducted.

Relative Grading Scheme

UMT has adopted the **Relative Grading Method** to grade its students.

The definition of letter grades and their corresponding grade points is given below:

Letter Grade	Grade Points
A+ / A	4.0

Letter Grade	Grade Points
A-	3.7
B+	3.3
B	3.0
B-	2.7
C+	2.3
C	2.0
C-	1.7
F	0.0
P (Pass)	—
I (Incomplete)	—
W (Withdrawal)	—
SA (Short Attendance)	—
S (Satisfactory)	—
NC (Non Credit)	—

Important: Under the Relative Grading Scheme, the final letter grade is determined in relation to the performance/ranking of students in the class, using an appropriate grading method such as the **Bell-Shaped Curve, Distribution Gap Method, or Standard Deviation.**
